Pohorje Eco Tracking Guided Tours

Your guide will teach you, among more than twenty hiking tours, how to read tracks and scat from wild animals on Pohorje. He will explain to you how to track and find wild animals/game, educate you about their behavior and habits. He will tell about his experiences from close encounters with wild animals, what problems they face because of climate change and human influence, and what you can do to help. Tours are available through whole year, but best conditions are during the winter on snow.

Usually available is tracking of following wild animals species: Red Deer, Chamois, Fallow Deer, Roe Deer, Wild Boar, Capercaillie, Black Grouse, Fox, Rabbit, Mountain Hare, Mouse etc. Of course we can arrange tracking and search of any other resident wild animal on Pohorje.

Please note, we do our best for you to search, track and find wild animals given above, but this are wild animals freely moving in their natural environment, which are hunted by men and fear us, so we can't guarantee we'll meet and observe them on first try.
